U. S. PUBLIC LAND SURVEY MONUMENT RECORD

INSTRUCTIONS:

This record shall show the location of the corner and shall Include all of the following nine elements (a through 1).

(a) Identify the corner by reference to the U.S. public land survey system.

O - Corner monument restored.

Quarter corner to Sections 6 & 7, T36N, R14E

(b) Describe any record evidence, monument evidence, occupational evidence, testimonial evidence or any other material evidence you considered, and whether the monument was found or placed.

Original comer set by James McBride in July 1859,

Original Bearing Trees:

Cedar - 8" - N36°W - 42 links Spruce - 10" - S15°E - 30 links

I positioned a math point at the corner location from which to search and found no evidence of the original bearing trees. The comer position falls on high ground in open hardwoods which is not consistent with the original notes pointing out swamp calls.

I set the comer at the proportionate position.

(c) in the plan view drawing below, provide reference ties to at least 4 witness monuments, or, If the location is within a municipality, to at least 2 witness monuments. (witness monuments shall be made of concrete, natural stone, Iron orother equally durable material.)

Show a plan view drawing depicting the relevent monuments and reference tles which is sufficient in detail to enable accurate relocation of the corner monument if the corner monument is disturbed. Indicate north.

> Set a 2 1/4" diameter x 36" long aluminum monument with a 3 1/4" diameter aluminum cap stamped: 1/4, S6, S7, T36N, R14E, 1993, S1685

(.)	Describe any material discrepancy between the location of the corner as restored or
	reestablished and the location of that corner as previously restored or reestablished
	by distance and direction. Show the discrepancy on the plan view drawing under (d).
	above. Show the distances betwen the corner as previously restored or reestablished
	and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness
	monuments shown on the Grawing in (d), above.

- (f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location ?
- (g & h) Was the carner reestablished through lost corner proportionate methods7 if so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

S87°-29'-12"E - 5528.24 (M) 2886.31 (M) 2641.93 (M) 43.70ch.(R) 40 ch. (R) 1/4 COR.

> 83.70 ch. (R) 5524.20 (R)

(R) - RECORDED (G.L.O) (M)- MEASURED

John R. Garske (type or print name) certify that the corner location shown on this record was determined by me or under my direction and control and that this U.S. Public Land Survey Monument Record Is correct and complete to the best of my knowledge and belief.
