## O = Corner monument restored.

## CERTIFIED LAND CORNER RESTORATION

Index No. V-13

History of original corner establishment:

Original corner established by James L. Nowlin, government deputy surveyor, in 1865 from which Birch 12" bears N82E 100 links and Hemlock 20" S63W 73 links.

Description of corner evidence found:

Recovered bottom end of old cedar post and old squared stake beside post point. This position falls on a very old fence line running north. All post and wire are down covered with moss and the forest floor. At 16.0' intervals uncovered old post and wire.

In 1908 N.H. Smith had a recorded distance of 5434.0' from NW sec. cor to NE section corner of section 33.

I have a distance of 5438.43' on this line.

Description of monument and accessories I established to perpetuate the original location of this corner. Replaced old post point with a 2-1/4" aluminum Forest County monument with 3½" alloy cap stamped: Marked Bts:

T37N R15E Black Spruce 10" N10W 31,19 S28 | S27 S33 | S34 Black Spruce 10" N51E 35.91 White Birch 7" \$84W 12,52" S1682-1986 A 12" white birch with face chopped into bears N59W 10.0'

(Register of Deeds)

Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

(f) Was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

perpetuated location ·

(g&h) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?
