History of original corner establishment:

Original Government Survey in 1858 by Alfred Millard. At 40.00 chains, set Quarter Section Post, from which the following bear; 12" Yellow Birch, N63 E, 4 lks., Cedar, 12", S65 W, 5 Îks.

In 1989 Glen Barker, RLS, with Consolidated Papers, restored the corner position at proportionate distance and on line between the Southeast and Southwest Section Corners of Section 34. Set a 2½" diameter aluminum Forest County Monument with an aluminum cap stamped to identify corner. Blazed and scribed new bearing trees;

 $N52^{\circ}W$ 16" 25.52 feet Red Maple Description of corner evidence found: N09°W Red Maple 48.69 feet N34°E Red Maple 41.83 feet s37°E Sugar Maple 6" 56.81 feet

Found monument and bearing trees as described above;

Red Maple	11"	N34E	41.89 feet
Sugar Maple	6"	s37°E	56.99 feet
Red Maple	9"	м ² еои	48.69 feet
Red Maple	14"	N52 ⁰ W	25.57 feet

Description of monument and accessories I established to perpetuate the original location of this corner. Set a Steel Sign Post, South, 0.74 feet from monument.

Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

None

(r) was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

Restored through acceptance of a found perpetuated location.

(94h) was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

No

6" Sugar Maple

S370E, 56,99 feet
