History of original corner establishment:

Original Government Survey in 1865 by William E. Daugherty and Alex McDill. West corrected between Sections 1 and 12, 39.99 chains, set Quarter Section Post to Sections 1 and 12, from which the following bear; Hemlock, 10", N36°W, 14 lks., Sugar, 12", S41°E, 13 lks. In 1970, Thomas Arnott, a Local Surveyor, Sub-divided Section 12. He re-established the corner position at proportionate distance and on line between opposing Section Corners. At the corner position, set a 2 inch dia. iron pipe, from which the following bear;

 Sugar
 10"
 S57°W
 10.35 feet

 Sugar
 12"
 S17°E
 44.10 feet

Description of corner evidence found:

Found iron pipe as described and in place, from which the following bear;

 Sugar
 11"
 S57°W
 10.35 feet

 Sugar
 13"
 S17°W
 44.10 feet

all of the above bearing trees were cut down for the Aerial Photo Project.

I accept the iron pipe in concurrence with the bearing trees as the best available evidence for restoring the corner position.

No original corner evidence was recovered. Description of monument and accessories I established to perpetuate the original location of this corner.

In place of iron pipe, set a $2\frac{1}{2}$ inch diameter aluminum pipe monument, 3 feet long, $2\frac{1}{2}$ feet in the ground, with an aluminum cap stamped; T39N, R14E, 1/4, S1, S12, 1985, S-1107. From which the following new blazed and scribed bearing trees bear;

Hemlock(Twin)	7"	N70°W	73.33 feet
.Maple	16"	N24°E	65.50 feet
Steel Sign Pos		NW	2.00 feet

(e) Describe any material discrepancy between the location of the corner as restored or reestablished and the location of that corner as previously restored or reestablished by distance and direction. Show the discrepancy on the plan view drawing under (d), above. Show the distances between the corner as previously restored or reestablished and (1) the corner as restored or reestablished, and (2) to at least 2 of the witness monuments shown on the drawing in (d), above.

See drawing below.

(r) was the corner restored through acceptance of (1) an obliterated evidence location, or, (2) a found perpetuated location?

Restored from accepted evidence.

(g&h) Was the corner reestablished through lost corner proportionate methods? If so, show the method, including the directions and distances to other public land survey corners used as evidence or used for proportioning in determining the corner location?

(i) I, (type or print name) certify that the corner location shown on this record was determined by me or under my direction and control and that this U.S. Public Land Survey Monument Record is correct and complete to the best of my knowledge and belief.

Survey requested by:

District Ranger
