SURVEY NOTES

This survey was made by John C. Schulke, a Registered Land Surveyor in the State of Wisconsin, for the U.S. Department of Agriculture, Forest Service. The purpose of the survey was for recovery, establishing, marking and perpetuating the corners and boundary lines of the U.S. Government Land on the perimeter and within Section 26, Township 41 North, Range 13 East, Fourth Principal Meridian, Forest County, Wisconsin.

The original Government subdivision survey of this township was made by Daugherty and McDill in 1865. A dependent resurvey done under the supervision of Mr. Veal was made and approved by the General Land Office in 1942. The control for this survey is based on the 1942 dependent resurvey.

The bearings between corner positions are true bearings as determined by reference to polaris observations. The accuracy of this survey exceeds the State requirement for closure of 1 in 3,000. Corners recovered or established by this survey are marked as described in the map legend. Each monumented corner is referenced to blazed, scribed, painted and tagged bearing trees. Tie bearings are magnetic, and not corected for declination.
